[01] PROFILE

15+ YRS

Senior full-stack developer for agencies and product teams — **Laravel business systems** and **headless Drupal + Next.js platforms**.

15+ years of production web work — frontend, backend architecture, deployment and the maintenance that keeps live systems running, solo or inside an agency team.

EXPERIENCE	15+ years
BASE	Surigao City, PH
AVAILABILITY	Remote · FT or contract
OVERLAP	AU full day · EU AM · US PM

[02] EXPERIENCE

[04]CAPABILITIES

6 LAYERS

FRONTEND	React, Next.js, Vue, AngularJS, Tailwind CSS, Alpine.js, Livewire, Bootstrap Next.js storefronts and app shells over headless CMS; Inertia + React for Laravel products.
BACKEND	Laravel, PHP, ASP.NET, C#, REST APIs Laravel APIs and business workflows for billing, inventory, booking and operations.
CMS & COMMERCE	Drupal, Payload CMS, Magento 2, WordPress, Joomla Content models delivered through Next.js; custom Joomla components and Magento extensions.
DATA & INFRASTRUCTURE	MySQL, SQL Server, Linux, Docker, Lando, Warden, Vagrant, Cloudflare R2 Local environments that match production, and Linux server support after launch.
MOBILE & WORKFLOW	Ionic, iOS, Android, GitHub, Bitbucket, SCRUM Ionic apps for iOS and Android; version-controlled, reviewed team delivery.
AI & AGENTIC TOOLS	Claude, Codex, GitHub Copilot, ChatGPT, Gemini Faster research, implementation and debugging — architecture and decisions stay with me.

[05]HOW I WORK

- 01

Production maintenance
Fixes, upgrades and support for live Joomla, Magento, WordPress, Laravel and .NET systems.
- 02

API & backend delivery
Laravel APIs and data-backed workflows for billing, inventory, booking and operations.
- 03

AI-assisted, engineer-owned
Copilot, Codex and Claude in a reviewed workflow — faster, still accountable.
- 04

Extension work
Custom Joomla components, modules, plugins and Magento extensions for real client needs.
